Aiming High and Going far!

I would like to begin by saying a huge well done to all of our children who have tried their very best in every lesson, every activity and every challenge. In particular, we are incredibly proud of our Year 6 children, who have shown determination, resilience and a fantastic attitude throughout their SATs. They have approached this important time with maturity and commitment, and we know just how hard they have worked.

I would also like to express our sincere thanks to all of our parents and carers who have been so supportive. Your help in making sure that your child comes to school every day and arrives on time really does make a difference. It helps children settle quickly, feel ready to learn and make the most of every opportunity. We can only teach children who are actually in school, so your continued support is truly appreciated.

As the weather begins to get hotter, please could we remind families to send children in with a water bottle containing only water. It is also important that children are wearing their summer uniform. For further guidance, please refer to the school website, where you will find more details. These small steps help children stay comfortable, safe and ready to learn during the warmer weeks ahead. In response to my recent email asking for a parent governor, I am very pleased to say that a parent has now shown an interest. I will send you all further details after the half-term holidays.

Finally, we have some truly fantastic news to share. Out of the 65 primary schools in Southwark, our school was selected by Into University to welcome some very important visitors and spend the morning completing a STEM activity. We were not told who the visitors were, due to heightened security, but the children and staff were excited nevertheless. At the appointed time, to everyone's astonishment, in walked Prince William and Princess Catherine! Our Year 5 children spent approximately one hour with the Prince and Princess. Prince William said he was impressed by our children's excellent behaviour, enthusiasm and thoughtful questions. In return, our children were able to dispel the misconception that Pluto is a planet! Thank you to IntoUniversity for choosing our school.

This once again confirms what we already know: although we may be small, we are truly amazing!

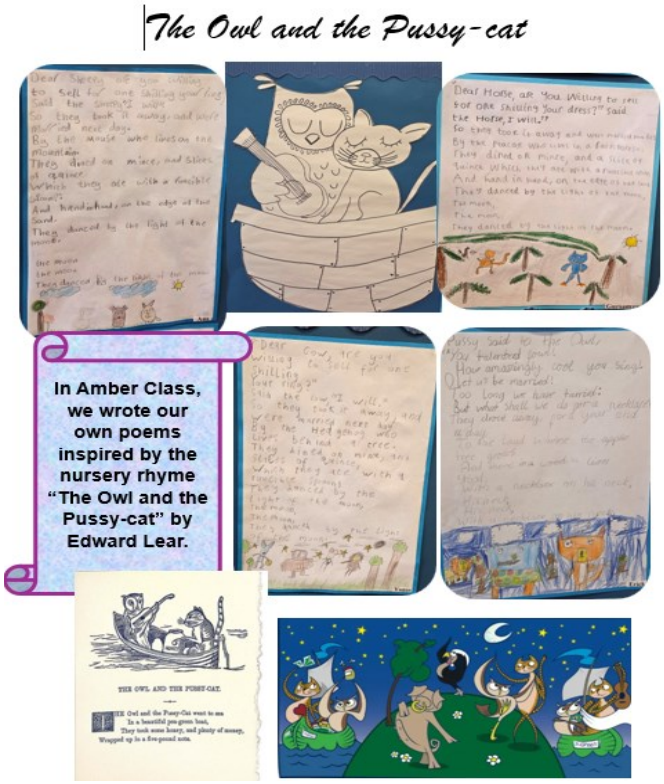
Amber Class…….



Ruby Class …...

In Geography, we have been learning all about the weather. We worked in teams to create our own weather forecast. We took notes of what the weather will be like on Wednesday and created a script. We then performed our forecast for the rest of the class, using our weather symbols and the temperature for all different parts of the UK by placing them on the map.

Career's Afternoon…

We have to postpone our **Career's Afternoon** as not enough parents and carers were able to offer support for this very important and usually highly inspirational event. Our children love hearing about different jobs, aspirations and life experiences, and these events help broaden their understanding of the world around them. A new date will be shared with parents and carers after half term, and we would love as many parents and carers as possible to take part.

EYFS…….

Gold and Silver class became little chefs for the day! They enjoyed learning how pizzas are made and had great fun creating their very own pizzas. The children showed excellent listening skills, creativity, and enthusiasm throughout the visit. It was wonderful to see the children working so carefully on their creations. Here's what some of the children said about the trip:

"I enjoyed when we spread cheese on top of the pizza" – Abdurizaq

"I really liked everything. It was so much fun"- Ayub

Summer Half Term — 25.5.26 to 29.5. 26 (school closed)
School Reopens — 1.6.2026 at 8.50am
